Magic EdTech

Reimagine the Engineering Lifecycle with Generative AI

## Embody the Future with Human-AI Synergy

The Future of Engineering Teams

Software development is undergoing seismic shifts. But with DeepSight, Magic's AI-Human service framework, we see room for leaner, more effective processes and remarkable productivity gains. Take a look at the Magic we can bring to your SDLC.

Do more with less

50%↑

Productivity gains of upto 50% across software development

55%↓

Reduce rework by up to 55%

Add new features to the platform at the same cost

Faster Go to Market

Our DeepSight framework utilizes these tools for productivity gains

Gitmind AI

Uizard

ChatGPT

Github Copilot

Amazon CodeWhisperer

Tabnine

Why Magic?

Join a league of organizations who enjoy the benefits of DeepSight's Responsible AI framework applied across their software development functions.

Unwavering commitment to excellence in IP protection, security, and privacy.

100+ highly skilled team trained on DeepSight Framework

Responsible AI frameworks driven by human intervention

Let the Transformation Unfold
